MSDGC Sewage Sludge Disposal/Utilization Permits

July 12, 1977

Mr. James F. Braxton
Assistant Chief Engineer
Metropolitan Sanitary District of
Greater Chicago
100 East Erie Street
Chicago, Illinois 60611

Dear Mr. Braxton:

The MSDGC has been operating its Nu Earth sludge disposal program, and the Calumet and Hanover Farms without the necessary permits required by the State of Illinois Environmental Protection Act. These programs fall under the regulatory responsibility of the Illinois Environmental Agency's Division of Water Pollution Control. It is expected, therefore, that the appropriate application forms and supporting documentation will be submitted to this Agency within 45 days to obtain permits consistent with the Regulations of the Illinois Pollution Control Board's Chapter 3 and the Design Criteria for Municipal Sludge Utilization on Agricultural Land, April, 1977 (draft copy).

Should you have any questions or comments concerning this Division's permitting policies, feel free to contact David W. Rodden of my staff.

Very truly yours,

W.H. Busch
